PERSONAL PROJECTS

Configuring Webserver in a Docker container.

(03/2021 - 03/2021) 🔗

- Configured the Apache webserver in a docker container thereby removing the dependency of having a host system for running the webserver. The docker container can easily be shipped to a different system and the webserver can work the same there without the need for any manual configuration.

High Availability Architecture using AWS CloudFront

(10/2020 - 11/2020) 🔗

- Created a high availability setup where the static contents like images, videos are kept in a S3 bucket and then with the help of AWS CloudFront service these static objects were made available in a website.
